Improved Air Quality
Reduced Regional Traffic Congestion

CAPACITY
Accommodates More Riders
Reduces Operating Costs

ELECTRIFICATION Caltrain **GROUND BREAKING**

SAN MATEO FACT SHEET | October 2018

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2022, will electrify and upgrade the performance, operating efficiency, capacity, safety and reliability of Caltrain's commuter rail service.

Caltrain Electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled trains with electric trains for service between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric vehicles.

CONSTRUCTION ACTIVITIES

In September 2017, Caltrain began performing work along the railroad corridor in San Mateo.

The activities during this time included locating underground utilities, testing soil conditions, inspecting signal/communication equipment, potholing, and pruning/removing trees in preparation for the installation and operation of the Overhead Contact System that will power electric trains.

DATE	WORK ACTIVITY	DURATION
Fall 2018	Potholing	2-3 months
Fall/Winter 2018	Foundation Construction	2-3 months
Winter 2018	Pole/Wire Installation	4-5 months
Early 2019	Paralleling Station Construction	4-6 months
<i>Expected durations indicates first and last day of activity. Number of actual work days will be fewer.</i>		

FOUNDATION INSTALLATION

Foundation work is in process and will continue over the duration of 2-3 months. Activities for the foundation construction will include excavation, placement of rebar, concrete fill and electrical grounding. Foundations are typically spaced 180 feet apart along the corridor and crews can complete a total of 2-6 foundations per night.

POLE AND WIRE INSTALLATION

Pole and wire installation will start in fall 2018 and continue for a duration of 4-5 months. Caltrain will be installing approximately one hundred eighty-nine (190) poles along the Caltrain Right-of-Way in the San Mateo corridor. Poles will vary in height from 30 feet to 50 feet. Poles will be spaced approximately 180 feet apart.

PARALLELLING STATION CONSTRUCTION

Installation of the Paralleling Station is expected to begin in early 2019 and continue for 4-6 months. The Paralleling Station is an unmanned facility that will provide and regulate electrical power to the electric trains through the Overhead Contact System. The Paralleling Station will be installed at the existing Hillsdale Caltrain Station parking lot south of Hillsdale Boulevard and will have a footprint of 90' x 30'. The footprint will contain a single transformer, control house, and access area. Installation of the Paralleling Station will also include installation of two gantry structures up to 50 feet.

WORK HOURS

Work will take place during the day and at night, with night work occurring between 8 p.m. and 6 a.m. There may be occasional 24-hour work on weekends. Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night and weekend activities, the field team will use acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

Peninsula Corridor Electrification

SAN MATEO FACT SHEET | October 2018

PUBLIC INFORMATION OFFICE

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**

The project e-mail is calmod@caltrain.com

In addition, Caltrain has established a community outreach office at:

2121 S. El Camino Real
Suite A-100
San Mateo, CA 94403

A project representative will be available to answer questions in person from 9:00 a.m. and 5:00 p.m. Mondays through Fridays during construction.

Sign up for weekly construction updates at:
