

CALTRAIN ELECTRIFICATION

KING STREET LANE CLOSURE NOTICE | January, 2022

UPCOMING ACTIVITIES AND LANE CLOSURE

Beginning January 24 through 26, 2022, Caltrain will continue foundation installation work in San Francisco that will require a temporary closure of one westbound lane of King Street at 4th Street to vehicle and bicycle traffic.

From 8 p.m. to 6 a.m. from January 24-26, 2022 there will be a temporary closure of one westbound lane of King Street at 4th Street.

Directional signs will direct the merging of westbound vehicle and bicycle traffic from the far-right lane into the adjacent westbound lane of King Street at 4th Street. The sidewalk on the south side of King Street will be open to pedestrian traffic during construction.

A detour map is provided on the reverse of this notice for vehicle, bicycle, and pedestrian traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will install concrete foundations for Caltrain Electrification. Work will consist of excavation, placement of rebar, concrete fill, electrical grounding, and the installation of foundations. Crews will utilize on-track equipment that requires the temporary closure of the above railroad crossing.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 10 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team

will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
