

CALTRAIN ELECTRIFICATION

UPCOMING CONSTRUCTION STAGING AREA ALONG LESLIE STREET LATE JUNE 2021 AND LASTING FOR APPROXIMATELY 3-4 MONTHS

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety and reliability of Caltrain's commuter rail service.

Caltrain Electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled trains with electric trains for service between San Francisco and San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric vehicles.

CONSTRUCTION ACTIVITIES

In August 2017, Caltrain began performing work along the railroad corridor in San Mateo.

Below is an expected schedule of the remaining work in San Mateo.

START DATE	WORK ACTIVITY
In Progress	Potholing and Signal Work
In Progress	Foundation Installation
June 2021	Use of Staging Area along Leslie Street
July 2021	Pole Installation
Mid-July 2021	Gantry Installation at Hillsdale Paralleling Station
Summer/Fall 2021	Wire Installation

Note: Subject to change based on contractor schedule

CONSTRUCTION STAGING

Caltrain crews will be staging materials, equipment and poles on Caltrain property near Leslie Street under Route 92 in San Mateo. Staging is scheduled to begin in late June 2021 and continue for 3-4 months, until all poles are installed in San Mateo. Activities will include the storing and unloading of poles using on track equipment, as well as the loading and unloading of construction train cars, other equipment, and will require the use of trucks and occasional use of backup alarms. Work will occur during the day and the evening, with night work hours occurring between 7 p.m. and 5 a.m. A map of the area is on the opposite side of this notice.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2024, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service. Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
