

CALTRAIN ELECTRIFICATION

W. SAN CARLOS STREET LANE CLOSURE NOTICE | November, 2020

UPCOMING ACTIVITIES AND LANE CLOSURE

On November 16, Caltrain will begin performing Bridge Barrier installation work in San Jose that will require a partial lane closure of the W. San Carlos bridge near Royal Avenue. A temporary lane closure is required due to construction equipment and crews conducting Bridge Barrier installation work on the W. San Carlos Street bridge.

Work will take place from November 16 to 27 with work hours between 9 p.m. to 5 a.m.

Directional signs will direct vehicle and bicycle traffic to use either the eastbound lane or westbound lane of W. San Carlos Street as a detour during construction. **Only one lane will be closed at a time.** The westbound lane will remain open when work requires closure of the eastbound lane. Once work in the eastbound lane is complete, crews will then close the eastbound lane and open the westbound lane for detour traffic. Sidewalks will remain open for pedestrian traffic.

A lane closure map is provided on the reverse of this notice for vehicle, bicycle, and pedestrian traffic.

CONSTRUCTION ACTIVITIES

During the closure, crews will install screen mesh and protection screen panels along the bridge overcrossing at W. San Carlos Street to ensure the safety of pedestrians and electrical infrastructure for Caltrain Electrification. Work will consist of the cutting of concrete, restoration, and the installation of bridge barrier components.

Crews will also be working along the Caltrain corridor to install foundations outside of the closure hours noted above. Work may take place during the day and at night, with night work occurring between 10 p.m. and 5 a.m. There may also be occasional 24-hour work on weekends.

Caltrain will work with contractors to minimize night work to limit the impact to surrounding communities; however, some work must be

performed at night in order to maintain regular Caltrain service. To mitigate noise and other impacts during night activities, the field team will utilize acoustical noise barrier blankets and will position lights away from residential and business areas. Caltrain has established a dedicated project hotline and email for residents concerned about these potential impacts.

PROJECT OVERVIEW

Over the last decade, Caltrain has experienced a substantial increase in ridership and anticipates further increases in ridership demand as the Bay Area's population grows. Caltrain Electrification, scheduled to be operational by 2022, will electrify and upgrade the performance, operating efficiency, capacity, safety, and reliability of Caltrain's commuter rail service.

Caltrain electrification is a key component of the Caltrain Modernization Program and consists of replacing diesel-hauled with an electric train system for services between Fourth and King Street Station in San Francisco and the Tamien Station in San Jose. The project will include the installation of new electrical infrastructure and the purchase of electric trains.

CONTACT INFORMATION

Caltrain has established a project information line and project e-mail for Caltrain Electrification to record and respond to questions and comments from residents and stakeholders.

The project information line can be reached at **650.399.9659** or toll free at **800.660.4287**.

The project e-mail is calmod@caltrain.com
